

Yanis CHELGHOU

2nd-year fullstack development student at Epitech Strasbourg, with hands-on experience from my internship at Odygo. Used to leading team projects, I want to keep growing in fullstack, cloud and AI/data.

**Seeking an internship as part of the 2nd year of my Bachelor's
Apr → Jul 2027**

To gain new skills and hands-on experience.

// EXPERIENCE

JUN - AUG 2026

Software development intern

Odygo - Schiltigheim

Full-stack work on a driving-school management platform: Prisma schema changes, Git branching across local, staging and production environments.

// PROJECTS

Portfolio

Personal site built with Next.js, with an animated React Bits background. Deployed on Vercel with automatic builds on push.

Job Aggregator

Collects job and internship offers from external sources, standardises the data and helps users compare them. Coordinated the team - task breakdown on Trello and deadline tracking.

Kaiju

Crisis-management platform for emergency teams: resource allocation across districts, role-based permissions and real-time visibility. Team lead, ongoing.

Tardis

Analysis of historical train-delay data to uncover patterns and build a model that forecasts delays before they happen.

// HARD SKILLS

PROGRAMMING

Python, TypeScript, SQL

FRAMEWORKS

Next.js, Vue.js, Express, Fastify

TOOLS

Prisma, MySQL, Git

SPOKEN LANGUAGES

French native · English advanced

// SOFT SKILLS

Teamwork

Autonomy

Fast learner

Client-facing experience
