Strasbourg, France

// PROJECTS

Portfolio

Personal site built with Next.js, with an animated React Bits background. Deployed on Vercel with automatic builds on push.

Job Aggregator

Collects job and internship offers from external sources, standardises the data and helps users compare them. Coordinated the team — task breakdown on Trello and deadline tracking.

// HARD SKILLS

PROGRAMMING

Python, TypeScript, SQL

FRAMEWORKS

Next.js, Vue.js, Express, Fastify

TOOLS

Prisma, MySQL, Git

SPOKEN LANGUAGES

French native · English advanced

// PROJECT

Kaiju

Crisis-management platform for emergency teams: resource allocation across districts, role-based permissions and real-time visibility. Team lead, ongoing.

// PROJECT

Tardis

Analysis of historical train-delay data to uncover patterns and build a model that forecasts delays before they happen.

// SOFT SKILLS

Teamwork

Autonomy

Fast learner

Client-facing experience

// EDUCATION

2025 — 28

Bachelor's in Digital Technologies and AI Engineering

Epitech Strasbourg — ongoing
